

Humanoid Robots: China's Hardware Dominance (2025)

Global Shipment Share

China ~90% Others ~10%

Key Bottlenecks

The Data Gap

Language data 100,000+ years of human text

Manipulation data ≈ 0

"ChatGPT writes perfect legal briefs, but a robot can't hold an egg steady"
— Ken Goldberg, UC Berkeley

Battery Life

Current: 2-3 hours/charge
Industrial shift needs 8+ hrs

Autonomy

Current: Pre-programmed + teleoperation
Sim-to-real transfer needed

Key Players (2025)

AgiBot 5,168 units
Unitree 5,500+ units
UBTECH Shipping
Tesla Optimus Not yet sold

140+ companies, 330+ models

The Displacement Spiral Extends: From Cognitive to Physical

AI software cuts white-collar → white-collar downgrades to blue-collar → robots cut blue-collar → nowhere to go

US controls the brain of intelligence (GPUs). China controls the body (robot hardware).
