

India's Four-Layer Cascade Effect

L1

IT Services Export Collapse
\$200B/yr at risk
TCS · Infosys · Wipro — Only advantage: cheap labor

L2

Urban Ecosystem Collapse
Bangalore · Hyderabad · Pune
IT collapse cascades: real estate, consumption, fiscal revenue — full chain break

L3

Migration Chain Breaks
The elite pipeline permanently closes
IIT → TCS → H-1B → Silicon Valley \$200K → Green Card — this path shuts down

L4

US Talent Pipeline Dries Up
30 years of Indian/Chinese/Eastern European engineers drove Silicon Valley innovation
High-skill immigration stops → US faces Japan-style stagnation

Impact amplifies at each layer

AI coding agent marginal cost ≈ electricity
