

Policy Levers and Timeline

Stabilize → Restructure → Safeguard

Three Action Lines

Distribute Dividends

Turn productivity gains into universal income

Cushion the Transition

Fiscal and market tools for the gap years

Rebuild Human-AI Division

Trust, physical and creative moats

0-5 yrs · Near-term

Buy Time

- Negative income tax / 20-40% top-up
- Transition fund + 6-12mo re-hire cover
- Compute dividend pilot (small levy)
- Youth guarantee: job, study or train
- AI safety: logs + human kill switch
- Public compute: cheap GPU hours
- Local resilience: grid, storage, care

5-15 yrs · Mid-term

Rewrite Distribution and Schooling

- Tax base: wages → capital/compute/CO2
- Sovereign compute, open models, GPU pools
- Lifelong learning accounts + tax credits
- Elder care: robot-human team standards
- City redesign: car parks → mixed housing
- Intl: compute swaps, data sovereignty

15-100 yrs · Long-term

Admit the Unknown, Keep Options

- Bio-enhancement + embodied AI pacts
 - Planetary backups (space compute)
 - Intergenerational equity funds
- The earlier the ethics and liability framework, the firmer the limits later.

Optimism isn't naivety — it breaks worst-case risk into tasks, then buys options with time, money and institutions

Not a prediction that things will turn out fine. A plan for making them less bad, starting now.
