

AI Reshapes Global Division of Labor: Compute = Power

GPU Distribution

US H100-equiv: 39.7M · China: ~400K · Ratio ≈ 100:1

Labor Cost Convergence

Most Vulnerable Economies

Bangladesh

60% textile jobs face automation

Garments = 80% exports by 2030

Philippines

1.3M BPO workers, 89% high risk

BPO = 7.4% GDP

Kenya

2.5M jobs face AI threat

40% Africa BPO jobs by 2030

Vietnam

Assembly model under pressure

Heavy FDI assembly dependence

Historical Parallel: Industrial Revolution Destroyed India's Handicrafts

India: 25% of world manufacturing (1750) → 2% (1900). British yarn price fell to 10% of 1779 levels.

The New Colonial Pattern

US/China: compute + automated mfg + AI platforms → Developing: data labeling + raw materials + captive markets

No gunboats needed — price itself is the weapon. And this time, it takes years, not decades.
